

## Take the Old Rag out of the Window

And put in a clear tight Glass or Sash

With very little time you can fix the old window so it won't let in the cold air, and will keep the warm air in. It takes fuel to heat the cold winter air that comes in through broken window glass, or loose and rotten sash.

We have window glass, putty and window sash, and they are not expensive, you can't afford to be cold and run the risk of sickness and the expense of heating the outside air.

If there is a crack in the plaster we have the stuff to fix it. It's **ACME PLASTER**, it will stop the cracks and the cold air leaks in the walls. You can plaster with acme for 13c per square yard.

If it's the attic, or a small room or a place you want to fix, without the muss of plaster

### USE OUR WALL BOARD

It's durable, inexpensive and is air tight, you can put it on yourself, all you need is a hammer and some nails.

At the recent state primary in Arizona Green H. Bolen, son of Thos. Bolen, of this city, was renominated to the office of mine inspector of that state by an increased majority. This is one of the most important offices in the state and the fact that Mr. Bolen was renominated by an increased majority is a fine testimonial to his efficiency as an official and his popularity over the state.

J. A. Wright, of Chicago, Illinois, who is visiting his sister, Mrs. Nelson Allman, near Amoret, favored us with a pleasant call while in the city Monday. Mr. Wright, who formerly lived southwest of town is one of the Times oldest and most valued friends, having been a reader of this paper for more than thirty years. He left Bates county about twenty years ago and says that not many of his former friends and neighbors are left.
